development, software systems administration, configuration management, data management, technical and logistics support for C4ISR and Fire Control Systems.

Naval Air Warfare Center Aircraft Division (NAWCAD) Patuxent River, MD, Sub to GDIT N00421-07-D-0024 CPFF, 09/07 – 08/12
POC: Margaret Hildreth (PM) 240-725-7077,

Margaret.Hildreth@gdit.com

Tasking Summary: Sabre professionals provide program management, engineering and technical support services to the Naval Air Systems Command (NAVAIR) 7.2 Information Technology / Information Management (IT/IM) Department at Naval Air Warfare Center Aircraft Division (NAWCAD) Patuxent River, MD. In this capacity, Sabre is responsible for Program Management, Technical Analysis, Programming Support, Programmatic Debugging and Implementation, Application Operation and Maintenance, Database and System Administration, System Engineering, Documentation, Enhancement and Management Support, Enterprise Network Operating Systems, Local Area and Wide Area Network Administration, Systems/Software Integration, SharePoint system administration, Information Assurance/Network Security, Software/Systems Maintenance and Enterprise Resource Planning. Sabre employs strategies in order to facilitate: building and maintaining NAVAIR IT/IM in compliance with all Department of Defense (DoD), Department of the Navy (DON), NAVAIR Plans, Policies, Procedures, and Guidance (PPP&G); ensuring planned and deployed IT/IM initiatives are designed to meet all NAVAIR Horizontal Integration (HI) mandates; ensuring overall efficient delivery of all assigned NAVAIR IT/IM programs and initiatives throughout; ensuring data center consolidation, virtualization and utilization targets are achieved in support of DON instructions and Federal IT reform policies. Sabre helps NAVAIR 7.2 evaluate data center and cloud computing technologies to support system virtualization and future cloud computing capabilities.
